

TS 4002

Alfalfa

**New !! Improved Drought
& Salt Tolerance**

Excellent Stand Life!!!

*Resistance to all Major
alfalfa pests*

Excellent Choice for
growers that need
persistence and longevity

Adaptation

Parental lines of **TS 4002** were selected for high resistance to those pests known to be limiting alfalfa production in the Northwest. Particular attention was paid to selecting for improved Drought, Salt Tolerance, Traffic/Compaction Tolerance, and Increase stand life.

Top Yield Performance

Bred for improved Yield and Persistence in marginal saline environments and soils. Bred for improved persistence and yield under poor moisture conditions.

Quality

TS 4002 is an excellent choice to improve forage quality in low production areas and/or pastures.

TS 4002 At a Glance...

- ◆ Fall Dormancy: 4
- ◆ Winter Survival Rating: 2
- ◆ Improved Drought & Salt Tolerance
- ◆ Excellent Multi-pest resistance
- ◆ High Phytophthora Root Rot Resistance
- ◆ High Resistance to all major pests
- ◆ Excellent choice to improve pasture quality
- ◆ Excellent Winter Survival
- ◆ Excellent persistence

Broad Spectrum Pest Resistance

Resistance to **ALL** the major alfalfa diseases. Broad spectrum resistance and improved tolerance to saline soils and low moisture conditions.
